

H₂O direct

For great tasting water,
use expert filtration.

ABOUT US

H2O Direct is a family run, UK Company that was established in 2009. They specialise in water filtration products such as water filters for use on coffee & vending machines, boiler systems and water coolers throughout UK and Europe. H2O Direct head office is based in the South East of England, with a branch in the Netherlands and a distribution hub in Germany.

They are sole distributors in the UK for Microfilter vending filters and MCM push fit parts, who are well known as suppliers to Samsung, Daewoo and LG.

BENEFITS OF WATER FILTERS

- Removes water impurities and dangerous contaminants
- Reduces plastic footprint
- Water will taste better
- Reduction in scale issues within machinery
- Drinks will have a more appealing appearance
- Enhances hydration

ASSOCIATIONS AND ACCREDITATIONS

Ion Exchange Filters

IEN / VH-IEN

H2O Direct have developed a range of ION Exchange Resin Filters that can be used in a wide variety of applications including hot water boilers, stem/combi ovens, hot liquid vending and espresso machines.

The technology within these filters reduce scale build up and prevent unpleasant metallic and/or chlorine tastes with an easy to change auto shut off facility, whilst protecting your machinery against costly break downs.

KEY FEATURES

- High level of scale reduction
- 0-70% Variable (VH-IEN) and Fixed 30% (IEN) bypass system options available with specially blended resin to stabilise pH levels
- Reduced chlorine content, bad taste and odour issues
- Superior performance and efficiency when compared to other leading brands
*in house testing
- Up to 9,000 Litre Capacity
- Service system available
- ▶ For use on Vending / Catering

Carbon Filters

K3 / M9 / MH4

K3 Inline / Refrigeration

KEY FEATURES

- 8,500 Litre Capacity
 - Scale Inhibitor (K3P)
 - GAC (K3G)
 - Chlorine Reduction
 - Taste & Odour
 - Small Coffee Machines
- For use on Water Cooler / Catering

M9 Quick Change / Multi Purpose

KEY FEATURES

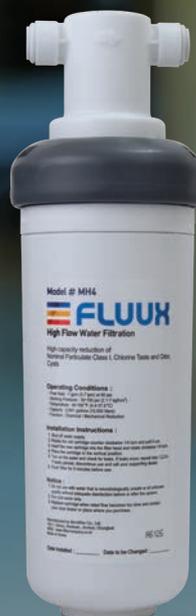

- 5,678 Litre Capacity
 - Auto Water Shut Off Valve
 - 1/2" Pushfit Connections
 - Scale Inhibitor (M9MP)
 - Chlorine Reduction
 - Single tap filtration
- For use on Water Cooler / Catering

MH4 Hi Flow/Hi Capacity

KEY FEATURES

- 10,000 Litre Capacity
 - Scale Inhibitor (MH4P)
 - Auto Water Shut Off
 - Quick Change
 - Chlorine Reduction
- For use on Water Cooler / Vending

Bacteria / Micro Plastic Filters

FX

Ultra filtration for Bacteria and Micro-Plastic removal.*

KEY FEATURES

- Up to 71,992 Litre Capacity
- *Eliminates bacteria, THM's & micro plastics more than 0.1 micron
- High Flow
- EP Compatible Cartridge
- Long life span
- Compatible filter heads
- ▶ For use on Water Cooler / Catering / Ice

Sediment Filters

SD

Sediment filter for protection from dirt, high TDS and rust within water. First line of defence against particulate matter in water.

KEY FEATURES

- 5 Micron filter for extra protection
- Helps make other filtration systems last longer
- Eliminates large dirt particles
- Compatible with other ranges of filters to create 'dual filter system'
- TDS Reduction
- NSF approved
- ▶ For use on Water Cooler / Catering / Ice

Service

i-DSCALE / Cartridges

Descale hot water tanks, taps, solenoids and pipe feeds on site with no dismantling required.

The 3 service cartridges are designed to work in conjunction with your existing filter ranges; MH4/IEN, VH-IEN and M9.

The service cartridge can be filled with the appropriate amount of descale solution 'i-DSCALE' and once reconnected into the head, the solution will be pushed around all the areas where descaling was previously not possible.

KEY FEATURES

- Fast Acting
- NO Residue
- Biodegradable
- Reusable
- No Tools Required

MH4/IEN

VH-IEN

M9

Fittings

H2O Direct provides customers with a wide range of parts from elbows and stems to adapters and valves. As well as WRAS approved MCM Express fit fittings, parts from John Guest and DM fit are also available.

Push fit fittings offer an easy and quick way to ensure a watertight system by simply pushing the tube or pipe into the fitting, resulting in installation times being dramatically reduced.

Environment and Recycling

Recycling the products we make as well as the products we use is key to our business model.

Our filters are sorted and recycled to ensure that the elements can be reused and recycled to either manufacture new filter housings or to make new products.

Recycling Update

(example of monthly recycling)

- 20,000 Kg of resin recycled
- 96% of materials recycled
- 6.6 Million plastic cups equivalent
- 120 Ton of equivalent CO2 saved
- 89% of materials used for new products

Resources

The H2O Direct website contains a wealth of knowledge, based on industry and technical know-how. Customers are able to shop 24/7 for filters, fittings and parts, together with next day delivery availability and technical helplines.

Other facilities available;

- Shop Online 24/7
- Next Day Delivery
- How to video guides
- 24 Hour technical helpline
- Try before you buy scheme
- Recycle programmes
- In person training facility
